

red green
blue orange
black blue
yellow gray
red pink

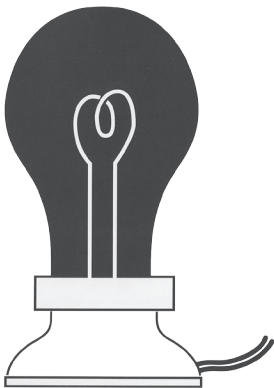

Challenge your brain! Read the list of colored words and name the color of each word out loud (not what the word *says*.) Read through as fast as you can, with a partner listening to correct you. You are witnessing the Scopes Effect.

AMAZING SCIENCE!

WWW.WPN.ORG

Optical Illusions are where the eyes send images to the brain, and the brain is confused or misunderstands the image. You might see something different than another person!
What do you see in the image below?

Stare at the lightbulb for 15 seconds, then
look at a blank piece of paper: does it glow?
Eyes or holes? Which are straight?
